**PLEASE COPY THIS FOR ALL HEALTH CARE PROVIDERS
IN YOUR PRACTICE**

TO: Health Care Providers
FROM: Mick Bolduc, Vaccine Coordinator-Connecticut Vaccine Program MB
DATE: March 10, 2014
SUBJECT: Influenza Formulations for 2014-15 Flu Season

The primary purpose of this communication is to inform you of the influenza formulations the Connecticut Vaccine Program (CVP) will be providing during the 2014-15 flu season.

Influenza Formulations

Once again this flu season the CVP will be providing influenza vaccine for all children 6 through 59 months of age regardless of insurance status as well as vaccine for all VFC-eligible 5-18 year old patients. All vaccines offered will be quadrivalent preservative-free formulations.

Below is a list of the flu formulations we will be supplying this upcoming influenza season:

Vaccine	Package	Dose	Age	Preservative Free	NDC #	CPT Code
Fluzone (Sanofi)	Single dose Syringe (Quadrivalent)	0.25 mL	6-35 months	YES	49281-0514-25	90685
Fluzone (Sanofi)	Single dose Syringe (Quadrivalent)	0.5 mL	3 years and older	YES	49281-0414-50	90686
Fluzone (Sanofi)	Single dose Vial (Quadrivalent)	0.5 mL	3 years and older	YES	49281-0414-10	90686
Fluarix (GSK)	Single dose Syringe (Quadrivalent)	0.5 mL	3 years and older	YES	58160-0901-52	90686
FluMist (MedImmune)	Single dose Sprayer (Quadrivalent)	0.2 mL	2-49 years	YES	66019-0301-10	90672

As soon as influenza vaccine becomes available (probably sometime in August) you will be notified that you can begin placing your flu orders. We will do our best to fill the orders as completely as possible but the majority of influenza vaccine may not be available until September/October.

As always, if you have any questions, please feel free to contact the CVP at (860) 509-7929.
